

Hitler and his Nazi's studied the US's final indian solution with much interest and implemented it in his final 'Jewish' solution aka the Holocaust and Genocide. The Nazis improved over US methods to a fault. Nice export America... The Nuremberg trials of Germany's WW2 war crimes were a sham and red herring away from what Stalinist, Russian purges and China's Mao cultural revolutions were doing. Hitler was a piker to them. However, US still takes the prize for genocidal murder of Native Americans. They and the buffalo were hunted nearly to extinction by US government and its agents before a spark of humanity stopped the atrocity.

However, survivors were herded into concentration camps called Indian Reservations to waste away and die. The original nation peoples were much tougher than expected, and like the buffalo have rebounded in numbers but not in life quality. Next time you puff out your chest about being a proud, patriotic, Amerikan, do a little history lesson. USA still tops communist China, Nazi Socialist Germany, and Socialist Russia in murdered numbers during the American genocide and holocaust that set as role model for rest of the world to follow in the 1900's and beyond. Wonder why the US education ministry does not teach the truth about the country's history?
